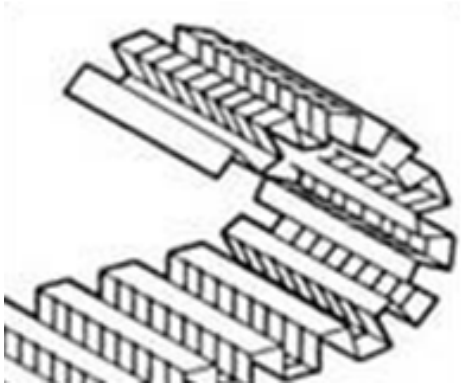
PRODUCT SPECIFICATION SHEET

ROLL OUT RAFTER TRAY | REF: AIR500



General

Roll out rafter trays are an effective way of preventing loft insulation from moving up to the underside of a roof underlay, they provide a un-interrupted means of air access into the roof from the eaves. Suitable for 400, 450 and 600 rafter centres.

Fitting instructions

To install just roll the trays over the rafters in right position to provide a clear air access above the roof insulation, fix the trays to the rafters by using staples or clout head nails. If it is a low pitch pitched roof, then you may have to join two trays together and remember if using soffit ventilation that the bottom of the tray must be kept at a minimum of 25mm from the back of the fascia board.

AIR500 Roll Panel All Sizes:

CODE	LENGTH & WIDTH	BOX QTY	BOX SIZE MM	WEIGHT PER ITEM	UNITS PER PALLET
AIR500	6m x 300mm	10	600X400X300	0.670kg	360
AIR500-4	6m x 400mm	10	600X330X405	0.894kg	300
AIR500-6	6m x 600mm	5	330X300X605	1.34kg	180
AIR500-8	6m x 800mm	5	330X300X805	2.14kg	140
AIR500-9	6m x 900mm	5	300X400X900	2.41kg	120
AIR500-10	6m x 1M	5	300X330X1005	2.68kg	120
