The T4MFC is an exterior wall ventilator fitted with a cowl; it is used in conjunction with 4 inch (100mm) ducting. The gravity flaps installed on this vent helps diminish back draughts and has been set behind the framework to reduce clacking in crosswinds, it has an elongated spigot to ease with attaching the ducting onto the vent. The screw mountings are hidden behind the flaps which keeps this product as aesthetically pleasing as possible. This product is used in conjunction with Airflows AIRDUCT RANGE
